ISO 14001 CERTIFICATION

Demonstrating Your Commitment To The Environment

BUSINESS CHALLENGE

The appropriate management of environmental issues positively impacts economic gain and compliance with statutory and legal license environmental discharge requirements. Further to this, care for the environment improves the image of your company.

Proof of a responsible approach is fast becoming a key purchase criterion. Environmentally conscious clients prefer to do business with like-minded companies, i.e. those who demonstrate their commitment through internationally recognised standards such as the ISO 14000 series.

SOLUTION

What is ISO 14001 Certification?

ISO 14001 is part of a series of international standards applicable to any organisation. Otherwise known as AS/NZS ISO 14001 throughout Australia and New Zealand, it is based on the Plan-Do-Check-Act cycle. ISO 14001 specifies the most important requirements to identify, control and monitor the environmental aspects and impacts of the operations of an organisation and how to manage and improve the system as a whole.

What are the key benefits?

- Demonstrate your commitment to the environment
- Increasing customer, investor, public, community and other stakeholder assurance by demonstrating commitment to ongoing sustainability
- Improving cost control through conserving input materials and energy
- Improving risk management, incident management and mitigation of your business impacts on the environment
- Assisting in the attainment of permits and authorisations

OUR APPROACH

Key Steps In Our Certification Process Are:

- Definition of certification scope;
- Pre-audit (optional): gap analysis and diagnosis of your current position against the standard;
- Certification audit performed in 2 stages:
  - **Stage 1** – readiness review performed to verify that the organisation is ready for certification
  - **Stage 2** – evaluation of implementation, including the effectiveness of the management system of the organisation
- A certificate valid for 3 years is issued upon satisfactory results of stage 2 audit;
- Surveillance audits to verify that the management system continues to fulfil the requirements of the standard and monitor for continual improvement;
- Re-certification after 3 years to confirm the continued conformance and effectiveness of the management system as a whole.
